

What is a New York ENERGY STAR® Labeled Home?

Homeowners experience:

- **Increased comfort**
New York ENERGY STAR Labeled Homes are warmer in the winter, cooler in the summer, free from drafts, quiet, and durable.
- **Lower energy bills**
You'll have lower energy bills every month, every year, that you own your home.
- **Peace of mind**
All New York ENERGY STAR Labeled Homes must pass a computer-based energy analysis.
- **A healthy living environment**
Mechanical ventilation systems help ensure good indoor air quality.
- **Environmental benefits**
Building more-efficient homes helps mitigate global climate change, lessens harmful emissions, and decreases associated health costs due to chronic respiratory ailments. The reduced greenhouse gas pollution of a New York ENERGY STAR Labeled Home is the environmental equivalent of planting about an acre of trees.

New York ENERGY STAR Labeled Homes employ proven technologies and advanced building practices to use approximately 30% less energy than conventionally built homes.

The comfort and efficiency of any home in any price range or style can be improved through enhanced insulation, better air sealing, mechanical ventilation, performance tested heating and cooling systems, and high-efficiency appliances, lighting, and windows.

Ask your builder about ENERGY STAR.
